

TESTIMONIAL

12th June 2020

Design Harmony is an Architecture Consultancy firm providing services of Sustainable Architectural Designs to Hotels, Resorts, Hospitals, Wellness Centres, Institutions, Offices and Residences.

As a professional who believes in the creative fusion of cutting edge technology with ancient principles, I wanted more clarity on my personal branding and engaged with Neha Mathur through her Personal Branding program. Over the course of the program, along with her able business partner, she provided excellent value and insight into personal development and branding. The program helped discover hidden truths and talents about myself and get a direction for future course of action. I would recommend everybody whether a novice or a senior professional to go through the program. It is sure to make a difference to what they are already doing and excel in their respective fields.

Here's to wishing Neha more and more such wonderful programs that can touch people positively.

Jaya
Principal Architect
